GLAMMING UP THE GARAGE: CLOPAY® INTRODUCES STEEL GARAGE DOORS IN BLACK

Feb 14, 2014

Move over white doors, in 2014 we'll be seeing a lot more drama and glamour in the place we park our cars as Clopay adds black to its steel garage door color wheel.

Painting a steel door black used to be a no-no, but new thermal reflective "cool paint" technology reduces heat absorption and retention.

Clopay's factory-applied black paint finish will be available on the Gallery® Collection and Classic Collection doors with Intellicore® insulation technology in March. Visit </residential-garage-doors.aspx> to see design options, which include matching decorative windows and hardware.
